

Double Balloon Endoscopy Prep:

WHAT YOU NEED:

- One large bottle of **polyethylene glycol 3350**. The most common brand is MiraLAX® but ClearLAX, Powderlax, etc. are examples of generic store brands.
- One package of **senna** of your choice. Senna comes in tablets, chocolate squares, and tea. If you need a liquid formulation and your child is 10 years or older, ask the GI clinic for a prescription.

EXAMPLES OF POLYETHYLENE GLYCOL 3350 PRODUCTS

EXAMPLES OF SENNA PRODUCTS

HOW TO USE MiraLAX®:

- MiraLAX is a stool softener for children ages 6 months and older. It works by bringing more water into the colon and softening the stool, making it easier to pass.
- MiraLAX comes in a powder that is mixed in clear liquid.
- **One dose** = 1 capful of powder + 8 ounces (1 cup) of one of the following clear liquids:

- | | | |
|-------------------|--------------|---------------------|
| • Water | • Popsicles | • Sprite® |
| • Flavored water | • Gatorade® | • Starry |
| • Jell-O® gelatin | • Powerade® | • Apple juice |
| • Slushies | • Pedialyte® | • White grape juice |
| • Icee® | • Kool-Aid® | |

AVOID:

- All solid foods
- Milk or dairy products
- Red- or purple-colored liquids
- Orange juice or juice with pulp
- Gatorade "Recovery" brand, which contains whey protein that should be avoided during prep

The goal of the bowel prep is clear stool from your child's intestine so we can safely see and navigate during the procedure.

- During the prep your child's stool should become light yellow to clear in color.
- It is important that your child stays hydrated while doing their prep. Encourage extra clear liquids!
- Poor bowel prep will result in cancelling or rescheduling the procedure.
